**Mission:** We are committed to deliver quality Pharmacy education in order to mould the learners into globally competitive Pharmacists who are professionally, intellectually adept and socially responsible.

### UTILITY

Pharmacognosy is a developing science that started by dealing with morphology and taxonomy of crude drugs, then it focused on isolation, quantification and structure elucidation of active compounds. Recently the term Reverse Pharmacognosy has evolved by concerning with the potential biological activity of a crude drug or its isolated compounds. This can result in the discovery of novel lead compounds or new biological activities. So via this seminar we would like to focus on some selected approaches of computer-based techniques like Computer-Aided Drug Discovery, Docking Studies, Chemometric Techniques and Molecular Pharmacognosy that are widely used and applied nowadays to develop advanced phyto-therapeutic applications.

### OBJECTIVES

In search of modern ways to increase secondary metabolites production in plants, implementing genetic engineering, and produce green pollution-free medicinal plants, modern computer-based techniques must be regarded. The introduction of Computer Aided Drug Discovery (CADD), in particular in-silico molecular modeling protocols have become indispensable for the study of macromolecular structures and interactions. In addition, the application of chemometric techniques allowed the analysis of multivariate data. Molecular pharmacognosy has been also introduced to carry the traditional pharmacognosy mission into a molecular level.

This seminar will be able to highlight:

- \* Role of computer-based technologies in the advance of pharmacognosy.
- \* Development of the term of reverse pharmacognosy with the aid of computer aided drug design and in silico molecular modeling.
- \* Chemometrics by relating chromatographic measurements to statistical data.
- \* Molecular pharmacognosy by introducing molecular biology techniques.

### EXPECTED OUTCOME

The knowledge obtained from these emerging new fields of Pharmacognosy will help progress in all fields of life. This can result in the discovery and study of novel lead compounds with new biological activities.

### ELIGIBILITY

Any students of UG/PG/Research Scholar, academicians from Faculty of Science and Technology and Industry Professional's working in Pharmaceutical Industries are eligible for the said conference.
