**Bore Well**

**Rainwater harvesting (RWH)**

RWH is the collection and storage of rain, rather than allowing it to run off. Rainwater is collected from a roof-like surface and redirected to a tank, cistern, deep pit (well, shaft, or borehole), aquifer, or a reservoir with percolation, so that it seeps down and restores the ground water.

### **Drinking Water Plant on Ground Floor**

The institute promotes the concept of three R's - "Reduce, Reuse and Recycle" motto to dispose the waste as much as possible while ensuring its proper disposal thus making for a clean and healthy campus. The institution has taken several initiatives for solid waste management, liquid waste management, and biomedical waste management, e-waste management including the waste recycling and hazardous chemicals and radioactive waste management. Ecological, economic and social framework is preserved and protected. The institution has decided to have a long-term commitment towards the established policies, to take a shared responsibility for the future. Blue, green red and yellow coloured dust bins are placed wherever necessary.

### **Solid Waste Management**

Littering of waste prohibited on the campus. Separate dustbins for biodegradable and non-biodegradable wastes, placed at various locations on campus including class rooms, laboratories and administrative office etc.the dustbins are labeled with instructions to distinguish the waste. Larger quantities of biodegradable waste were destroyed through incinerator to make environment free from pathogens. Yard waste is collected, dried up and used as compost for the college garden.

### **Liquid Waste Management**

Waste water and other neutralised liquid waste from the laboratories are disposed through well-constructed drainage system, which collects in to the separate soaking pits available at individual blocks. Waste water from RO plant is de-scaled and is used for watering the plants and flushing the toilets.

### **Bio-medical Waste Management**

Biological waste from the Anatomy-Physiology, Microbiology and Pharmacology laboratories and animal house are disposed by following proper treatment protocols as this biodegradable waste materials are destroyed by the process of incineration with the help of incinerator. Surgical needles, syringes, vials.

### **Drinking Water**

Poules and other related non-degradable solid materials used in the laboratories are placed in proper disposable containers-sanitary napkin incinerators are provided in the rest rooms of the institution whereas the same are disposed through from the girl's hostel.

### **E-Waste Management**

The institution has an MoU with New Star Trader Enterprises, Chopda to collect electronics waste (E-Waste) includes electronics apparatus, computer monitor, keyboard, mouse, CPU, power supplies, function generators, CRO, voltmeters, ammeters, cameras, television, projectors, motors, fans etc., from Smt.Sharadchandrika Suresh Patil College of Pharmacy

### **Hazardous Chemicals and Radioactive Waste Management**

Faculty members and lab assistants guide and monitor the students in the careful use and handling of chemicals in all the laboratories. Fuming chambers are provided in the laboratories for the careful handling of hazardous chemicals in Chemistry laboratories. Exhaust fan is provided to expel out harmful and dangerous gases out of the laboratory. Students are strictly instructed to take measure to protect them selves while using the chemicals in laboratory.

### **Disabled Friendly, barrier free environment**
